CS110 / INDEPENDENCE ROAD

pitch / George Arbache

Issued: Nov 10, 2026, 2:50 PM Pacific

Record: FORM-895E44D479923FA200AA8DE3

Personal public verification code: VIEW-09B729640A64D42C5F0A885B

Include your own public code with every assignment, even in a team folder. Never submit your private recovery key.

SHA-256: e2f7a9812df887e42cb1afcf13c4944cf7c5b7e948a35ef7aa6508092847e13c

Verify the record number at courses.addp2p.com/development-road/independence/index.html?view=verify

An issued record preserves submitted information. It is not a grade or proof of comprehension.

What do you understand about the work and finish line?

I understand that bounty hunting involves tracking down a target, gathering information, and completing the assigned task safely and responsibly. The finish line is successfully locating the target, meeting the objectives, and providing proof that the job has been completed.

What will you contribute? Name a task or useful capability.

I bring good teamwork, communication, and problem-solving skills. I can help track down targets, gather useful information, pay attention to details, and support my teammates so we can complete the bounty successfully.

What needs research, support or practice?

I still need to learn more about tracking techniques, identifying targets, gathering accurate information, and planning successful missions. I also want to improve my communication and teamwork skills so I can help the team better.

Your available work times and preferred contact method: Discord, email, text, classroom or other. Keep private addresses/numbers outside public exports.

Preferred contact: Discord

I'm always avaliable on discord classroom, phone number, social media, etc.

List your project tools and why you need them.

We are using ChatGPT, Discord, Visual Studio, Unity.

Required: name the AI you will use, its project task and how you will verify its output. Use course-provided/shared or approved local access if needed; no personal or paid AI account is required.

AI: ChatGPT, Claude, Gemini

Task: ChatGPT, Claude, Gemini will help us complete our project, answer questions, etc.

Verification: Testing the codes though Visual Studio checking sources, etc.
